

EALD

The EALD program supports students who are learning English as an additional language or dialect to develop confidence, capability, and strong language foundations across their schooling.

Our EALD team is made up of Peggy Lau and Helena Sukno.

Reception to Year 2

Helena works with students on Wednesdays and Thursdays, focusing on early language acquisition and development, vocabulary, oral language, and using English confidently in everyday school contexts.

Years 3 - 6

Peggy works with students on Mondays to Wednesdays, supporting the development of academic language. This includes functional grammar, sentence structure, vocabulary, and genre-specific writing, helping students clearly express their ideas and show their understanding across learning areas.

Our EALD students are closely supported in small group work, and the language concepts are closely connected to what students are learning in class. The program builds on students' existing strengths while supporting English language acquisition, helping students grow in confidence and fully access their learning.
